

These won't

- 1 There is absolutely *no security* for private and confidential files in an unlocked filing cabinet.
- 2 Locked filing cabinets provide *no evidence* of illegal access. They can be easily opened or picked without leaving a trace of entry.
- 3 If you want to secure your paperwork (confidential information, expenditure records, personnel files, wages records) — you need **Secur-a-file™**.
- 4 **Secur-a-file™** cannot prevent its contents from being stolen — but then neither can a padlock or a locked filing cabinet. The tamper-evident security system of the **Secur-a-file™** will clearly indicate if anyone has tried to access the file. Experience shows that the threat of being caught is sufficient to deter snoops from taking a potentially damaging peek into private and confidential paperwork.
- 5 Whether placed on the rails in a standard filing cabinet or outside, **Secur-a-file™** has an intimidating appearance which is sufficient to deter all but the most determined thief.

This one will

European Distributor:

E. J. Brooks (Europe) Ltd, 6 The Metro Centre
Bridge Road, Kent BR5 2BE, UK
Phone: +44(0) 1689-836331
