# SECUR-A-FILE

Keyless, tamper-evident security system for sensitive information

Size: LEGAL FOOLSCAP A4

So you think that your secrets are secure in a locked filing cabinet?

Locked filing cabinets provide no evidence of illegal access. Locks can easily be opened or picked and closed again without leaving a trace.
It is impossible to prevent a snoop from stealing from the **Secur-a-file**™, but the system will clearly show that an illegal entry was made.

- **Each security seal** carries a unique seven digit code. Simply record the code used to close the file—if the seal is broken or carries a different code, a security breach has occurred.
- **Security zip chain** wrong side out cannot be easily remeshed if breached
- **Security piped seams** prevent illegal access by cutting and resealing the seam
- **Warning graphics** deter attempts at illegal access
- **Identity windows** on the Secur-a-file's front and top
- **Heavy-duty coated rods** fitting standard filing cabinets will provide years of service

MADE IN CHINA

SECUR-A-FILE

Keyless, tamper-evident security system for sensitive information

The newest concept in document protection. Our revolutionary plastic security seal, unlike a lock, leaves a visual record each time the **Secur-a-file™** is opened —any unauthorised tampering will result in a broken seal.

WARNING This Secur-a-file™ is fitted with a tamper-evident sealing system.

CONFIDENTIAL

SECUR-A-FILE

Size: US LEGAL FOOLSCAP A4

INSTRUCTIONS FOR USE

1. Close zip and place puller over security chamber projection
2. Insert seal's twin arrowheads and push home until they click in place
3. Record seal code and date on the included card
4. To open, break the seal by lifting upwards

This package contains
