# BAG NOTES

EasySort bag and frame set

The easy and fast way to sort the office mail or fill individual branch courier bags on a desk top or filing cabinet is with our **EasySort** bag and frame set.

The bag has a unique design, it is basically a flat satchel that converts to a bag when the sort frame is inserted.

EasySort is produced from heavy duty PVC in two sizes, for A4 and for A3 documents, and is available in six popular colours.

The **EasySort** set includes a free address label fitted with split rings for easy fitment to the frame

Blowing in the wind

We have the answer to stop those outdoor sandwich board signs blowing away on a windy day.

Our **Big Show** shot bags. The weight of these bags varies from 5kg through to 20kg.

Our horse-shoe shape (half circle) shot bags are used by traffic authorities for anchoring witches hats. This is an excellent shot bag for anchoring outdoor signs as it can be placed in a number of strategic positions to hold the sign in place.

Bags for all reasons

Bagmasters produce a wide range of bags that keep the wheels of industry turning. For example:

· **Dangerous goods bags** for Patrick Stevedores. This is a standard style of dangerous goods bag used both by the railways and road transport industries.

· **Head set storage bags** for Air Nauru and Ansett Air lines.

· **Kodak photographic courier bags**— you will see these hanging in photographic and chemists shops, news agencies and wherever there is a Kodak photo processing sign.

If you have the need for a special bag try us—we most likely have the answer amongst the more than 1100 different styles of bags we produce for industry.

Tired of replacing the paper filing suspension files in your cabinet?

We have the answer to this annoying problem in our **Tough One** heavy duty suspension file. This file is produced from the same heavy duty PVC out of which we produce our courier and mail bags.

The reinforced PVC is sewn onto heavy-duty 4 mm diameter galvanised steel rods

Identification tabs with clear-PVC protective covers are permanently sewn into the file's frame

Velcro pads for securely closing the file when required

The metal rods are specially formed to prevent rolling and back-and-forth movement in the file pocket

Reinforced PVC: Polyester scrim sandwiched between two layers of heavy-duty PVC

A range of 8 popular colours: red, orange, yellow, green, blue, mulberry, white and black

Standard or gusset bottom

Original style bank night-safe wallets

These are almost an oddity from the past. The banks have replaced them with one-time-use plastic drop bags. Bagmasters still produce the original style **Bank Night-Safe Wallet**, fitted with the world's best night-safe wallet lock— the A. Rifkin Co. **Arcolock 7**.

We have a growing list of clients who purchase these night-safe wallets for their personal or office security needs. The wallets are ideal for secure storage of items such as passports, currency, keys to the filing cabinet, pills, special signing pen, private and confidential computer disks, etc.
